

Domain Name Registration

Establish Identity and Preserve Your Brand Online

Claim your online identity and manage every detail with our complete domain name solution. We offer 100 top-level domains and an intuitive Web-based control panel with all the tools you need to maintain your domain name.

Finding a Name Is Easy. We suggest similar, available names for every domain name you type into our domain name spinner. With so many extensions to choose from, you're sure to find the best available domain name for your Web site. We offer all of the most popular extensions: .com, .net, .org, .biz, .info, and .us.

Maintain Your Brand Integrity. Don't let disreputable businesses destroy your brand by using slight variations of your name as their domain names. Take advantage of bulk registration pricing to register as many versions of your name as possible and forward the traffic to your main Web site.

Gain Trust and Raise Your Search Engine Ranking. Having your own domain name gives your business a more legitimate appearance than using free domains containing your Internet service provider's domain name. Search engines also give more weight to the contents of a domain name's index page. So, you'll rank higher when you create the index page for your own domain name.

Control Panel Features:

- Business card page template
- DNS manager
- Edit nameservers
- Add domain aliases
- Domain forwarding
- Create subdirectories
- Update account information
