

# Web Hosting Plans

## Launch and Grow Your Online Presence

Take your business online quickly and efficiently with our Web hosting plans. You get the complete package — everything you need to launch and manage every detail of your Web site with tools that streamline the process from start to finish.

---

**Don't Let Inexperience Hold You Back.** Our hosting plans give beginners and professional Web designers the tools and support to reach their fullest online potential. An easy-to-use Web design tool guides beginners through each step of creating a Web site while all of our business solutions support multimedia and databases for more advanced Web designers.

**Instantly Launch and Update Your Site.** The intuitive central control panel launches your Web site with a single click, lets you make changes 24/7 and stores detailed traffic reports so you can measure the effectiveness of your marketing campaigns. Generous storage and traffic allowances give you the freedom to expand your Web site as your needs change.

**Manage Email and Web Hosting in One Place.** Included in all hosting plans, our email accounts give you the professionalism of having your domain name in your email address: [yourname@yourcompany.com](mailto:yourname@yourcompany.com). Plus, each account is protected by a highly-effective spam and virus filter.

**Much of Your Success Depends on Reliable Web Hosting.** What good is a Web site customers can't visit? Put your trust in servers housed in advanced data centers with controlled-entry, redundant power supplies and networks and guaranteed 99.99% uptime.
